## SEED TREATMENT

### 2023 DUAL SEED TREATMENT OPTIONS

We want our farmer partners to be as profitable and successful as possible. Our agronomy team offers two seed treatment options to help provide outstanding protection against disease, insects and Sudden Death Syndrome (SDS) based on individual farm needs. These treatments are part of our Integrated Pest Management program (IPM) which covers pest control and weed management.

CRUISERMAXX® APX

**CRUISERMAXX® APX** is our baseline premium treatment. This combination offers protection with multiple modes of action against disease and insect pressure.

- ✓ Delivers Early-Season Protection with Unmatched Power
- ✓ Allows Freedom to Plant Whenever Growers Choose
- ✓ Builds on the Proven ROI Potential of CruiserMaxx® Vibrance®
- ✓ Contains A Novel Mode of Action

SALTRO®

**SALTRO®** is offered to partners who require strong protection against Sudden Death Syndrome (SDS) and soybean cyst nematode as a complement to CruiserMaxx® APX.

**SALTRO®** provides superior SDS and robust nematode activity protection without unnecessary stress leading to healthier roots and plant performance.
